THE UNPOPULAR LOAN.

There is little to be said about the new bond issue. It is probably the best thing that can be done under the circum-to leave the law as it is and not to try stances, but it is a crying shame that the strongest and richest country on earth should, by the blunders and obstinacy of its own Government, be placed in a position where it has to pay three three-quarters per cent. Interest on a thirty-year loan, when the ruling rate for money is only from 2 to 3 per cent.

For this state of affairs both Congreand the Administration are equally t blame. Obstinacy and stupidity in both the executive and legislative branches have wrecked the credit of the nation until to-day the Government has to pay a higher rate of interest than do savings

Instead of a popular loan at 3 per cent to be taken by the people, and the bene-fit of which would be reaped by the people, we have an unpopular loan of 3% per cent, to be taken by one or two blg inkers for the benefit of foreign finan-

Then they want gold bonds instead of ordinary bonds, which mean gold anyway, thus casting a suspicion on he good faith of the Government.

President Cleveland has been warmly praised for his persistent and positive assertions that every obligation of the Government shall be paid in gold. That is right. It is honorable. It is just. He regards four ommissioners as enough, and thinks pay, except the President, who should are in the whole State of Nebraska. they should serve as at present, without ontinue to receive five thousand dollars

Until the Park Board got into the hands of the politicians the affairs of the Department were managed in a satisfactory manner, and all that was done n the parks was directed by intelligence culture and artistic taste. The pride of the old-time Commissioners was to make the pleasure grounds of the city as beautiful and enjoyable as possible and the credit they received was compensation erough for the service. The position of Park Commissioner was one of honor, and our most prominent citizens were at all times ready to accept the

Ever since the Department has been in the hands of the politicians it has been brought to the level of the other city departments and been used for patronage and pickings, while the parks have been neglected and gone to decay The present Commission has been especially notorious for incapacity, as well as for its defiance of public sentiment.

As Mayor Strong will now have the power to remove the present Commissioners and put men of the old stamp in their places, it may be just as well

audience at the Metropolitan Opera-House last night was not large. and it was certainly not enthusiastic The lack of volume was probably due to the cold, white storm; the absence of enthusiasm was occasioned by the first performance in America of Saint-Saens's opera, "Samson and Dallia." It was apathetically, originally on account of an uninteresting cast, and then for its own monotonous sake. The story of the Biblical strong man does not lene itself willingly to opera-makers. lovers of romance however, insist upor the love interest that is to be found in Dubita's siren-like woolng of Samson But when a stout lady thus woes muscular gentleman, singing her woo ing, and singing it in Italian, too, as American or English audience is no going to burst into bubbles of exuber

"Samson and Dallia," is dreadfulb tiresome. It moves along prostly from start to finish. The first act, with Abim ilech, the Philistine, and the High Priest of Dagon, and the mournful horus, seemed strangely foreign to the Metropolitan Opera-House, and the second act is a perpetual duet between Samson and Dalila. No audience could get up an interest in such a couple, unless he were a De Resake and she Mellia. Saint-Saens's music is not as odd as his admirers might believe. It is not at all fantastic, but smooth-flowing and unemotional, except in one or two instances. There are one or two mustcal incidents in this opera that have been appreciated, and that were greatly liked last night. They are the tuneful slipped and fell, and then he couldn't get up oases in a flat Sahara, and the audi-ence welcomed them warmly. There is slong. Sleeping-Room Curtains. Four sets of curtains are sometimes used in sleeping-rooms, being put up as follows: Next the window hang thin curtains of muslin or lace shirred over ed and hanging straight or draped back at each side. These curtains reach only window sash. Next come the window shades, the dark green nearest the winthen the inside curtains of silk or chints. These are oftenest shirred over a red at the top, though they are sometimes hung

by rings from poles.

Beet Braise. Three pounds of lean beef; onion, car-rot, turnip, parsiey and bay leaf. Put the vegetables in bottom of deep crock or pan; lay thin slices of salt pork over; then the beef, tied and skewered; cover with pork, pour over a cup of boiling water and cover closely with a paste o flour and water. Bake slowly two and one-half hours; uncover, placing the meat in hot oven for half an hour. Rub vegetables through a strainer; thicken

Many housekeepers use the tea leaves which are left after making tea to scatter over carpets when they are swept, but the leaves will stain very delicate carpets. Wet newspapers wrung nearly dry and torn in pieces collect the dust and lint and do not soil the carpets. A dark floor covering often looks dusty and dim after an ordinary sweeping. Put a few drops of ammonia in the water which you use to wet your newspapers and it will brighten and freshen the colors wonderfully.

Try Potatoes This Way To-Morrow. Bake the potatoes, cutting off the ends and scooping out the contents, Mix, when thoroughly mashed, with butter, two level tablespoonfuls for six potatoes; one egg, well beaten, for the same number, grated cheese. Consult the taste as to the quantity of cheese to be used. Work soft with milk. Stuff the skins carefully, replacing the ends. Put back in the oven and let them stay long enough to be thoroughly hot.
